HealthCare Analysis across India

Project Description :

1. 1. **Dataset :** HEALTH_CARE
2. 2. **Source of the Dataset :** Dataset Source
3. 3. **Brief Description of Dataset :**
4. a. Wellness-Centres in India
5. b. Public Health Facilities
6. c. Public Health and Family Welfare Funding Allocation d. Stillbirths and C-section trends
7. e. Human Papillomavirus Virus(HPV)
8. f. Mental disorders
9. g. Polio Vaccination
10. 4. **Tools :** Matplotlib, Plotly, Seaborn, Tableau, Minitab

Project Team :

1. **Pakhi Singhal** [22bds042]
2. **Preethi Varshala** [22bds045]
3. **Ravi Raj** [22bds051]
4. **Arnab Rai** [22bds005]

Justification : Dashboards offer a visual representation of healthcare data in India. They aid in identifying health trends, optimizing resource allocation, and making informed decisions. By tracking disease prevalence, access to care, and vaccination rates, dashboards contribute to enhancing public health outcomes.
